Employment Opportunity – Software Development Intern
Immediate Opening. Posted 1/6/20

Overview:
Pelican Technologies has an intern position open for an individual who wants to get a good start with a software development career. For 15 years, Pelican has authored unique software solutions that provide our customers with the tools that they need to increase business process efficiency and become more profitable. These systems and applications are used in industries as diverse as public safety, retail sales, health care, thoroughbred horse racing, logistics and hospitality.

Software Development Interns work closely with Jr. and Sr. Software Developers to facilitate customer facing projects while learning the art of programming and industry best practices. The position reports to the management of Pelican Technologies. This position is an exceptional opportunity for an individual who likes a challenging and meaningful growth environment. This position is intended for college students to meet the internship requirements for graduation.

Pelican is a small business that is growing. Our team is culturally diverse, collaborative and goal oriented. The intern will fit into our existing team and will have a dedicated project assignment based on initial skill set and educational experience.

The successful candidate will have:
- Ability to proficiently write and debug software in at least one object-oriented language (C#, Java, C++).
- Understanding of web development (HTML, CSS, JSON, AJAX).
- Understanding of databases and their uses as well as an exposure to SQL.
- Interpersonal skills including verbal and written communication skills.
- Creative problem-solving skills and debugging skills.

Work environment and compensation:
Pelican Technologies is a collaborative environment – the opinions and inputs from our team matters and is respected. Our secure offices are located on Linden Avenue near US-35 and I-675. The internship is paid, can be either full or part time depending on class schedule, and has a term of 3 to 6 months at which point a mutual hiring decision is discussed.
